# EasySync an Update

# ?

- Do you use a backup program?
- What do you use
- What do you miss in that program

- Do you use a synchronization program?
- What do you use
- What do you miss in that program

# EasySync

- The purpose of EasySync is :
  - Support file backup
  - to synchronize two directories with each other.
- Provide a simple graphical view of the planned synchronization
- Normally the two directories are on different machines.
- Simple Interface, Graphical
- Unlimited number of files

# Improvements Additions (Ver. 3.2)

- Additional icons have been added to better explain why an anomaly has occurred

- Anomalies are now displayed in the prediction window

- The scripting sub-system has been completely overhauled –
    - Creating and editing scripts and script lists

- The log file can be directly accessed

- Sounds have been added

- Drives are uniquely identifiable

- Specific files in the menu files used,  can be removed

# Improvements Additions

- The next synchronisation direction of the wheel is now displayed
- Improved logic so that when changing sync files are no longer re-read
- Added option to only display drives that are available
- Anomalies added to the result filter
- Bug fixes
